

Using Systems Design for Seamless Summer Feeding Program Back Office Setup:

To use Systems Design for Seamless Summer Feeding Program three items need to be setup in the master files (FS-01). The First item is to identify which campuses are going to participate in the program by selecting the campus in the School Master Record (**FS-01-03**) and selecting a **'Y'** in field **09** as shown below:

```

Systems Design
MAY 12, 2009          CAMPUS FILE MAINTENANCE          CHANGE          SCH002--28
CAMPUS ID: -----[0102]

01= CAMPUS DESC --[Hollywood and Vine Elementary  ]

```

You need to repeat this step for each campus that is going to be a part of your Seamless Summer Feeding program. We also suggest that you take the time to fill out additional information in the school master record including the off campus prices (fields 13 through 16) which is the price a student from that campus (campus 102 in our example) would be charged if they ate at any other campus in the district.

You need to also check and see if you need to update the scheduled hours worked at that campus matches the number you have in field 11 (LABOR HOURS).

The next step is to setup a menu for each campus you selected earlier, for each meal you are planning to serve [First Meal(breakfast), Quick Meal (snack) ,Midday Meal (lunch)] or all. You will do this from the Menu Master File Record (**FS-01-02**) using the **"A"** option to ADD a new record since it may not already exist. You will also need to select **"F"** for Seamless Summer Feeding Program Breakfast, **"Q"** for SSFP Snack, and **"M"** for SSFP Lunch as prompted by the system and shown below. These codes are to distinguish between meals served under the

5/23/2012

Seamless Summer Feeding Program and meals that could possibly be served to students attending summer school and eating under the National School Lunch and Breakfast program. You will be prompted to answer the questions for meal item number , the price (press the enter key for zero price for student) If the system prompts "ACCOUNT ALREADY ON FILE" because the menu item already exist, you will need to press the escape key <ESC> twice. Then select 1 and "C" for change to review the menu item and pricing as seen in the example below.

The screenshot shows a Windows-style window titled "Systems Design". Inside, the text is as follows:

```
MAY 12, 2009          SCHOOL MENU FILE MAINTENANCE          ADD          SCH0061130
SCHOOL NUMBER ----[0102] Hollywood and Vine Elementary
MEAL TYPE -----[F]
MEAL ITEM NUMBER -[01] RESERVED FOR REIMBURSABLE MEALS

01= ITEM DESCR ----[SFP BRKFST ]
02= CLASS -----[R] Reimbursible
03= ITEM PRICE ----[ .00 ]
04= REDUCED PRICE -[ .00 ]
05= STAFF PRICE ---[ .00 ]
06= VISITOR PRICE -[ .00 ]
07= 2ND MEAL PRICE-[ .00 ]

ALL OK?(YNC)-[n]   FIELD-[ ]*
```

At the bottom, it says "COPYRIGHT 2008 - SYSTEMS DESIGN".

A few things to keep in mind when setting these menu items (in Version 2.0 or better*) is that the first 14 items are reserved for the reimbursable meal types (seen in field 02 CLASS) above. Any other items that the district wants to sell such as milk, ice cream, fruit need to be placed in MEAL ITEM NUMBER 15 and above.

The last item that may need to be set up is a Generic ID number for recording meals being served for the Seamless Summer Feeding Program. You may use the standard account ID "S" in the Meal input screen (FS-02-01) for student to record meals if you are running Version 2.0 or higher of Systems Design Point of sale software. If you want or need to set up an additional Student number or have an older version and have to claim meals under you can do this under the Quick Inputs and Create Menus (FS-01-22-02*). If you do not have this option on your system call Systems Design at 800-887-1828. You will notice that the student accounts setup in this program have a "G" as the status of the student for this process, because it will allow you to serve multiple meals under the same number and you will not get the "MEAL ALREADY SERVED" message each time you serve an additional meal to this Generic Account.

***If your district does not have version 2.0 or greater release contact Systems Design for a free upgrade.**

This is an example of the Quick Input screen (FS-01-22-02)*. You will notice that you are prompted to enter the School number (campus 0102 in this example) then input the three digit clerk number that you wish to set up the "G" generic free account for meal severing, the program

5/23/2012

will set up an account for **S**tudent, **A**dult, staff, and **V**isitor will all be created from this one step. Simply repeat the step for all schools and clerks you wish to set up as in the example below.

You can check to make sure all your accounts are setup at your district by running a Select Status Report (**FS-04-08**) for all campuses and selecting the status "**G**". This will print a report listing all Generic Accounts available at your district.

You will be able to get a report of the meals served under the the Accuclaim Reports found under **FS-04-21 option 2**.
